Dear Friends

Warm Greetings!

Aligner treatment has come a really long way from an isolated company fabricating them only for a select few to now multiple companies in the foray reaching out to everyone who seeks. Also there has been a significant rise in patient awareness and expectations which are leading to a paradigm shift from traditional visible braces to invisible aligners.

32 Watts has been a company which has stood out amongst its contemporaries for their friendly approach, hand holding and innovative and creative ideas. They have a very strong and dedicated team out to assist right from inception to completion of treatment. Their seminars, lectures and hands-on have been always spot on and have attended to the problems and troubles which orthodontists face while using aligners. I wish them all the success in their ever evolving journey.

Best Wishes Always,

**Dr Sridhar Kannan**
